

## Enabling Global Services

## 🕒 About Us:

Oakston Technologies is an Integrated Captive Center Services Company. That means, we help companies to design, set-up and operate their own technology and back-office centers in US.

Oakston Technologies is solely focused on building global competencies for its clients in the captive mode. We do understand that setting-up and operating a captive center is fraught with challenges, and hence we created a model and methodology that brought all the benefits of offshore to our clients, and minimized the risks of being on your own. We welcome you to learn more about our services and capabilities.

At Oakston Technologies Services, we energetically strive to deliver the best employment options for great companies and the associates we place within them. We serve thousands of companies by sending them the highest -quality individuals for temporary, temp-to-hire and full-time positions.

Companies make Oakston Technologies their first choice for full-time, direct hire, temp-to-hire and temporary employment agencies because we're at the forefront of the ever-changing Consulting industry. We meet our clients' needs - precisely, quickly and cost-effectively - with the finest talent. Furthermore, our associates seek job placement with Oakston Technologies because we have outstanding benefits and deep regional experience in top markets. We know how to deliver great opportunities and keep our people happy, a potent combination for our clients and associates alike.

Oakston Technologies Services is a highly professional Consulting services organization that prides itself on the high quality of our customers, the work assignments we make available for associate employees, and the validity and fairness of our work practices.

Oakston Technologies commits to provide all employees with a work environment free of discrimination related to sex, race, color, religion, age, ethnic, or national origin, disability, or other illegal and inappropriate basis. We protect employees from retaliation for bringing complaints to the attention of Oakston Technologies management - thus encouraging an efficient, productive, and satisfying work environment.

## 🕒 SAP GRC / SAP Compliance Services:

As your organization strives for growth and competitive advantage, it looks to IT to drive business efficiency, agility, and innovation. As a result, IT excellence is no longer a luxury it's a competitive requirement.

SAP IT Excellence delivers a comprehensive set of services, enablement tools, and methodologies. It enables you to craft an effective IT strategy and align it with business objectives. And it gives you the tools and methodologies you need to optimize your IT infrastructure and protect your mission-critical applications from technical risks.

SAP IT Excellence focuses on the production, or "run," phase of the software life cycle, which commands the largest piece of the IT budget and presents the IT team with the greatest challenges. The portfolio addresses the following business challenges:

- » Align IT and business strategies
- » Enable agility and continuous functional improvement and maintenance
- » Ensure a stable and predictable IT environment

### Services that Deliver Value

The SAP IT Excellence portfolio delivers value to your organization from three perspectives:

- » Strategic SAP IT Excellence enables you to align IT and business strategies, improve innovation, and optimize your ability to adapt to change all while reducing total cost of ownership.
- » Functional The portfolio enables you to boost employee productivity, improve your ability to create value, and increase your return on IT investment.
- » Technical With SAP IT Excellence, you can ensure that IT operations are stable, predictable, and performing at the highest levels. You can also mitigate risk, better manage change, and optimize both IT infrastructure and business processes.

## 🕒 SAP Compliance:

SMB Validation & Compliance Group Inc. "Our 'trademark' is our understanding that 'Validation is a Regulatory Requirement within a Business Environment, not a Science in itself.' We understand that Pharmaceutical and Medical Device manufacturers purchase equipment in order to run production, not to have reams of documentation written about it and then spend countless hours executing those documents. We use an efficient systematic, risk based, quality system approach to developing protocols. We also employ a common sense, pragmatic approach to protocol execution which allows us to fulfill all regulatory documentation requirements efficiently and with a minimum of delay and with a minimum of interference with our customers' operations. We have worked with all the major equipment suppliers to the pharmaceutical industry and we have developed solid relationships with these manufacturers in order to quickly obtain the information required to develop protocols for their machinery.

We are experienced validation professionals, providing flexible practical solutions. We have knowledgeable, dedicated staff. We maintain strong relationships with equipment suppliers promoting improved project performance.
